AI Resume Analysis Report

Resume: jas_resume.pdf

ATS Score: 72/100

Technical Skills

1. Python
2. SQL
3. Data Structures & Algorithms
4. OOP Concepts
5. FastAPI
6. Flask
7. React.js
8. PostgreSQL
9. Machine Learning
10. NLP
11. scikit-learn
12. Tailwind CSS

Soft Skills

1. Leadership
2. Good Communication
3. Time Management

Strengths

1. Clear, targeted professional objective for a Python Developer / Backend Engineer role.
2. Relevant hands-on projects integrating backend APIs (FastAPI/Flask), databases, and Machine Learning/NLP.
3. Clean and standard resume layout that is easy for ATS parsers to extract basic information.

Weaknesses

1. Missing essential developer tools such as Git/GitHub, Docker, and Linux from technical skills.
2. Project descriptions lack quantifiable impact, metrics, or performance measurements.
3. Minor spelling and formatting errors (e.g., 'Hackothon' instead of 'Hackathon').

Missing Skills

1. Git / Version Control
2. Docker
3. REST API Design
4. Unit Testing (pytest)
5. Linux / Bash
6. Cloud Services (AWS / GCP / Azure)

Suggestions

1. Add Git/GitHub to your skill list and include GitHub repository links for your projects.
2. Quantify project achievements (e.g., 'Achieved 92% accuracy in fake news classification', 'Optimized API response time').
3. Correct the typo 'Hackothon' to 'Hackathon' under the Certificates section.
4. Include relevant coursework or certifications related to Cloud/DevOps or advanced Python to strengthen the backend profile.

Overall Feedback

Jaswanth has a solid entry-level resume tailored for Python Developer and Backend Engineering roles. The project section demonstrates practical application of modern frameworks (FastAPI, Flask) and data handling. Adding version control (Git), quantifying project outcomes, and polishing minor typos will significantly improve the ATS score and recruiter engagement.
