AI Resume Analysis Report

Resume: jas_resume.pdf

ATS Score: 70/100

Technical Skills

1. Python Programming
2. SQL
3. Data structures & Algorithms
4. OOP Concepts
5. FastAPI
6. Flask
7. React.js
8. PostgreSQL
9. NLP
10. Machine Learning
11. scikit-learn
12. Tailwind CSS
13. Java

Soft Skills

1. Leadership
2. Good Communication
3. Time Management

Strengths

1. Hands-on full-stack and machine learning project experience using modern frameworks like FastAPI, Flask, and React
2. Detailed project bullet points explaining functionality, stack, and application features
3. Clear alignment between objective statement and Python Developer target role

Weaknesses

1. The dedicated Skills section omits key modern technologies present in the project descriptions (e.g., FastAPI, PostgreSQL, React)
2. Lack of direct GitHub/portfolio links to review project source code
3. Absence of work experience or internships
4. Missing essential developer toolsets like Git/GitHub, Docker, or Cloud services

Missing Skills

1. Git / GitHub
2. Docker
3. REST API Design
4. Unit Testing (PyTest)
5. Linux / Command Line
6. Cloud Platforms (AWS / GCP / Azure)

Suggestions

1. Add technologies used in projects (FastAPI, React.js, PostgreSQL, scikit-learn) directly to the top-level Technical Skills section.
2. Include GitHub profile links and specific repository links for each project.
3. Add Git/GitHub under developer tools, as version control is critical for backend roles.
4. Quantify project achievements where possible (e.g., model accuracy score for the Fake News Detection project).
5. Consider moving high school education details lower or shortening them to keep the focus on B.Tech degree and technical projects.

Overall Feedback

The resume shows strong project-based software development experience suitable for an entry-level Python Developer role. Improving ATS optimization requires aligning the primary Skills section with technologies demonstrated in projects, adding developer tools like Git, and providing direct links to source code repositories.
