AI Resume Analysis Report

Resume: jas_resume.pdf

ATS Score: 72/100

Technical Skills

1. Python
2. SQL
3. Data Structures & Algorithms
4. OOP Concepts
5. FastAPI
6. Flask
7. React.js
8. PostgreSQL
9. Machine Learning
10. NLP
11. scikit-learn
12. Tailwind CSS
13. Java

Soft Skills

1. Leadership
2. Communication
3. Time Management

Strengths

1. Practical project experience using modern Python frameworks (FastAPI, Flask) and databases (PostgreSQL)
2. Clear target role alignment stated in the objective
3. Good balance of backend, frontend, and ML technical skills

Weaknesses

1. Lack of measurable impact or quantitative achievements in project bullet points
2. Essential software engineering tools like Git/GitHub are missing
3. Placeholder contact link (LinkedIn text without actual URL)
4. Vague descriptions and spelling issues in the Certifications section ('Hackothon')

Missing Skills

1. Git / GitHub
2. Docker / Containerization
3. REST API Best Practices
4. Unit Testing (pytest)
5. Cloud Services (AWS / GCP)
6. CI/CD

Suggestions

1. Include metrics in project bullet points (e.g., 'achieved 92% classification accuracy', 'processed resume parses in <2 seconds').
2. Add Git and Version Control to skills and demonstrate use via GitHub links to projects.
3. Replace 'Linkedin' text with a full hyperlinked URL or complete profile path.
4. Fix typos ('Hackothon') and specify dates/details for certifications.

Overall Feedback

The resume shows strong entry-level potential for a Python Developer role, backed by practical full-stack and ML projects. Adding version control tools, quantifying project achievements, and providing working portfolio links will significantly boost ATS performance and recruiter response.
