AI Resume Analysis Report

Resume: jas_resume.pdf

ATS Score: 72/100

Technical Skills

1. Python
2. SQL
3. Data Structures & Algorithms
4. OOP Concepts
5. FastAPI
6. Flask
7. React.js
8. PostgreSQL
9. Machine Learning
10. scikit-learn
11. NLP
12. Tailwind CSS
13. Java

Soft Skills

1. Leadership
2. Communication
3. Time Management

Strengths

1. Hands-on project experience using modern Python frameworks like FastAPI and Flask
2. Good integration of Machine Learning, NLP, and database management (PostgreSQL/SQL)
3. Clear structural layout with defined sections for objective, education, projects, and skills

Weaknesses

1. Missing mention of essential backend tools like Git/GitHub for version control
2. Lack of quantified metrics or measurable impact in project bullet points
3. No mention of cloud deployment, containerization (Docker), or testing frameworks

Missing Skills

1. Git / GitHub
2. Docker
3. PyTest / Unit Testing
4. AWS / Cloud Deployment
5. RESTful API Authentication (JWT/OAuth)
6. Redis / Caching

Suggestions

1. Explicitly add Git/GitHub to the skills section and provide links to public project repositories
2. Quantify project accomplishments (e.g., accuracy percentages, processing speeds, user capacity)
3. Deploy projects to platforms like Render, Vercel, or AWS, and include live URL links
4. Include testing frameworks like Pytest and mention experience with API documentation tools (Swagger/OpenAPI)

Overall Feedback

Jaswanth presents a well-structured resume suited for an entry-level Python Developer role, featuring relevant backend and machine learning projects. To significantly increase ATS compatibility and attract prospective employers, he should add version control tools (Git), containerization (Docker), live project links, and quantifiable achievements in his bullet points.
